EXECUTIVE SUMMARY – NOVEMBER 2025

Illegal, Unreported, and Unregulated (IUU) Fishing:

The total number of incidents in October 2025 showed a slight increase compared to October 2024. Illegal net usage remained the primary issue, accounting for most reported cases. A few incidents involved violations of certificate conditions. Although rare, explosive fishing continues to be a serious concern requiring ongoing attention.

Poaching: Three incidents.

Maritime Incidents: Maritime incidents in October 2025 showed an increase compared to September 2024. Technical failures were the leading cause reported during this period.

Drug Smuggling: Three incidents.

Contraband Smuggling: In October 2025, smuggling incidents showed a slight increase compared to the previous year. Ice is the primary item smuggled.

Human Smuggling: One incident.

Explosive and Firearms Smuggling: No incidents reported in October 2025.

Overall Analysis: In October 2025, the total number of incidents showed slight fluctuations compared to October 2024, with some areas recording decreases while others experienced small increases. Illegal net usage and technical failures remained the most common issues across both maritime and fishing-related incidents. Smuggling activities saw a slight decline, primarily involving Kendu leaves, while drug-related cases were exclusively linked to Kerala cannabis and ice. Although serious incidents such as explosive fishing continue, monitoring and robust preventive measures are essential to maintain safety and curb illegal activities.
