**FORMATION FUSION CENTER**

# **WEATHER FORECAST FOR SEA AREAS AROUND THE ISLAND DURING NEXT 24 HOURS**

**Issued at 05.30 a.m. on 06 April 2026**

**DEPARTMENT OF METEOROLOGY  
SRI LANKA**

**COLOMBO - SRI LANKA**

# CONDITION OF THE RAIN

Showers or thundershowers are likely at a few places in the sea areas off the coast extending from Kankasanthurai to Pottuvil via Mannar, Puttalam, Colombo, Galle and Hambantota.

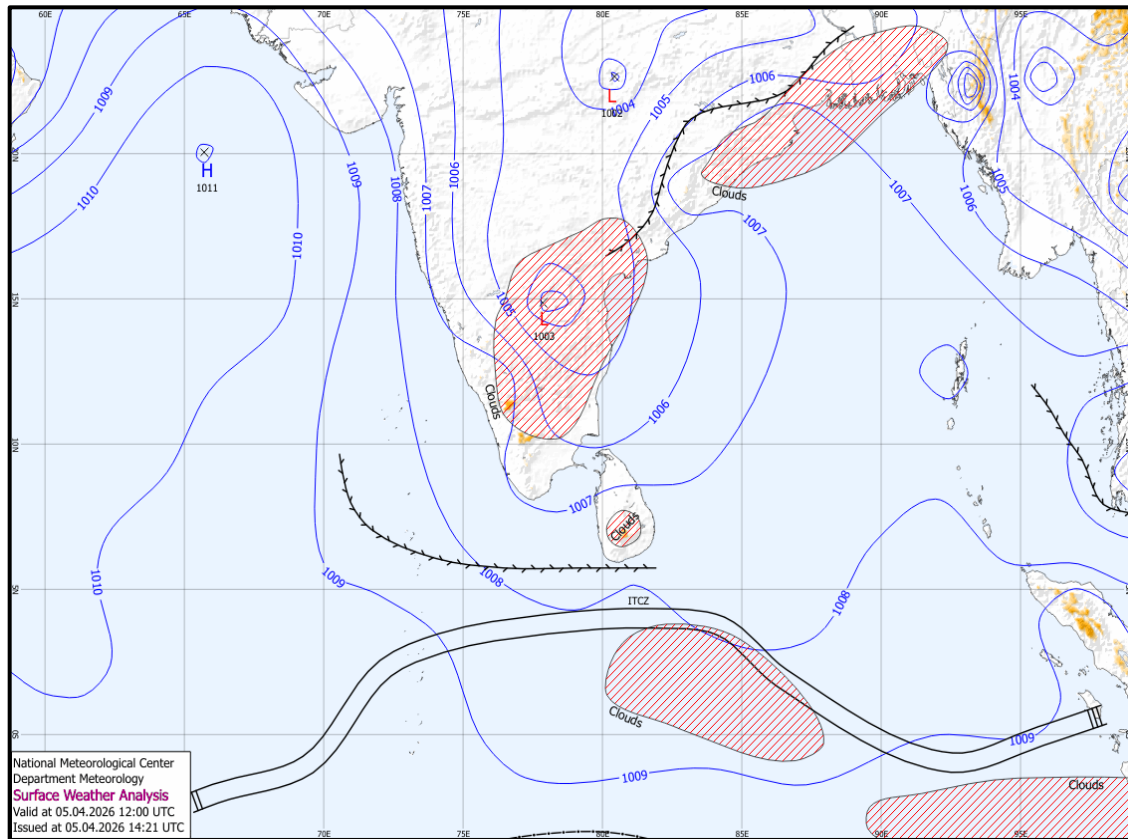

# WINDS

Winds will be South-westerly or Westerly in direction. Wind speed will be (25-35) kmph. Wind speed can increase up to (40-45) kmph at times in the sea areas off the coast extending from Galle to Pottuvil via Matara and Hambantota.

# STATE OF SEA

The sea areas off the coast extending from Galle to Pottuvil via Matara and Hambantota may be fairly rough at times. The other sea areas around the island may be slight or Moderate. Temporarily strong gusty winds and very rough seas can be expected during thundershowers.

# SURFACE ANALYSIS CHART

This analysis charts show the surface pressure pattern over Sri Lanka and the surrounding area. They display isobars (lines of equal pressure) and indicate areas of high (H) and low pressure (L) along with their central pressure value. Isobars are represented by solid blue lines, spaced every 1 hPa. High pressure is usually associated with mainly dry, settled weather with light winds, while low pressure is normally associated with unsettled weather, which is often wet and windy. The lower the pressure, generally the stronger the winds and the heavier the rain.

The map shows Coordinated Universal Time (UTC) and the local time is UTC+5.30.
