WEATHER FORECAST FOR SEA AREAS AROUND THE ISLAND DURING NEXT 24 HOURS

Issued at 05.30 a.m. on 28 Aug 2026

**DEPARTMENT OF METEOROLOGY
SRI LANKA**

CONDITION OF THE RAIN

Showers may occur at several places in the sea areas off the coast extending from Chilaw to Hambantota via Colombo and Galle.

WINDS

Winds will be South-westerly. Wind speed will be (30-40) kmph. Wind speed can increase up to (50-60) kmph at times in the sea areas off the coast extending from Kankasanthurai to Puttalam via Mannar and from Hambantota to Pottuvil. Wind speed can increase up to 50 kmph at times in the sea areas off the coast extending from Kankasanthurai to Trincomalee via Mullaitivu.

STATE OF SEA

The sea areas off the coasts extending from Kankasanthurai to Puttalam via Mannar and from Hambantota to Pottuvil will be rough at times. The sea areas off the coasts extending from Kankasanthurai to Trincomalee via Mullaitivu will be fairly rough at times.

The wave height may increase about (2.0 – 3.0) meters in the sea areas off the coast extending from Puttalam to Pottuvil via Colombo, Galle and Matara. There is a possibility that near shore sea areas off the coast extending from Beruwala to Matara via Galle, may experience surges due to swell waves.

Naval and fishing communities engaged in activities in the aforementioned sea areas, as well as coastal communities living in the aforementioned nearshore areas, are advised to remain vigilant in this regard.

SURFACE ANALYSIS CHART

28-Aug-26

IFC -Colombo

This analysis charts show the surface pressure pattern over Sri Lanka and the surrounding area. They display isobars (lines of equal pressure) and indicate areas of high (H) and low pressure (L) along with their central pressure value. Isobars are represented by solid blue lines, spaced every 1 hPa. High pressure is usually associated with mainly dry, settled weather with light winds, while low pressure is normally associated with unsettled weather, which is often wet and windy. The lower the pressure, generally the stronger the winds and the heavier the rain.

The map shows Coordinated Universal Time (UTC) and the local time is UTC+5.30.
