FORMATION FUSION CENTRE

# WEATHER FORECAST FOR SEA AREAS AROUND THE ISLAND DURING NEXT 24 HOURS

Issued at 05.30 a.m. on 27 January 2026

DEPARTMENT OF METEOROLOGY  
SRI LANKA

COLOMBO - SRI LANKA

# CONDITION OF THE RAIN

Mainly fair weather will prevail in the sea areas around the island.

# WINDS

Winds will be north-easterly and wind speed will be (30-40) kmph. Wind speed can increase up to 50 kmph at times in the sea areas off the coast extending from Negombo to Mannar via Puttalam and from Matara to Pottuvil via Hambantota.

# STATE OF SEA

The sea areas off the coast extending from Negombo to Mannar via Puttalam and from Matara to Pottuvil via Hambantota will be rough at times.

Other sea areas around the island will be moderate.

# SURFACE ANALYSIS CHART

27-Jan-26

IFC -Colombo

This analysis charts show the surface pressure pattern over Sri Lanka and the surrounding area. They display isobars (lines of equal pressure) and indicate areas of high (H) and low pressure (L) along with their central pressure value. Isobars are represented by solid blue lines, spaced every 1 hPa. High pressure is usually associated with mainly dry, settled weather with light winds, while low pressure is normally associated with unsettled weather, which is often wet and windy. The lower the pressure, generally the stronger the winds and the heavier the rain.

The map shows Coordinated Universal Time (UTC) and the local time is UTC+5.30.
