Date 2026.03.09

WEATHER FORECAST FOR SEA AREAS AROUND THE ISLAND DURING NEXT 24 HOURS

Issued at 05.30 a.m. on 09 March 2026

**DEPARTMENT OF METEOROLOGY
SRI LANKA**

CONDITION OF THE RAIN

Mainly fair weather will prevail over the sea areas around the island.

WINDS

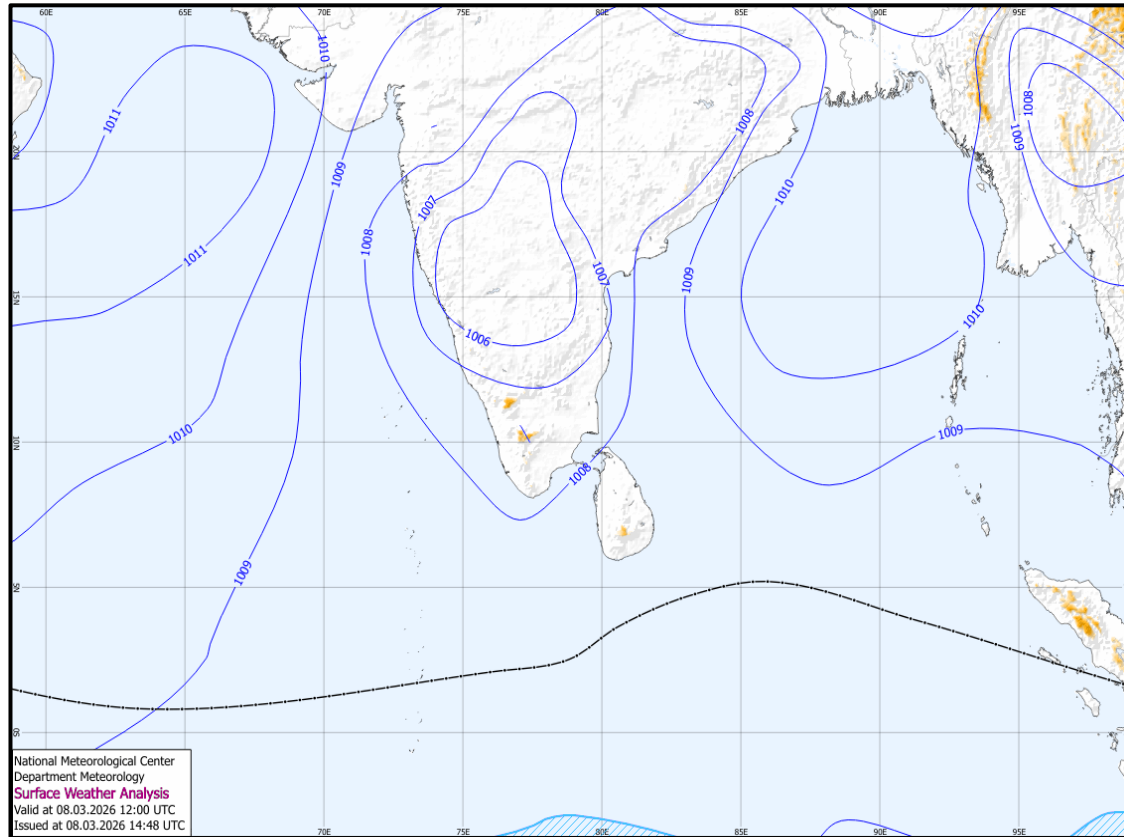

Winds will be easterly to northeasterly in the sea areas off the coast extending from Kankasanthurai to Galle via Trincomalee, Pottuvil and Hambantota. Winds will be variable in direction in the other sea areas around the island. Wind speed will be (20-30) kmph.

Wind speed can increase to 40 kmph at times in the sea areas off the coast extending from Kankasanthurai to Puttalam via Mannar.

STATE OF SEA

The sea areas off the coast extending from Kankasanthurai to Puttalam via Mannar will be moderate at times. The other sea areas around the island will be slight.

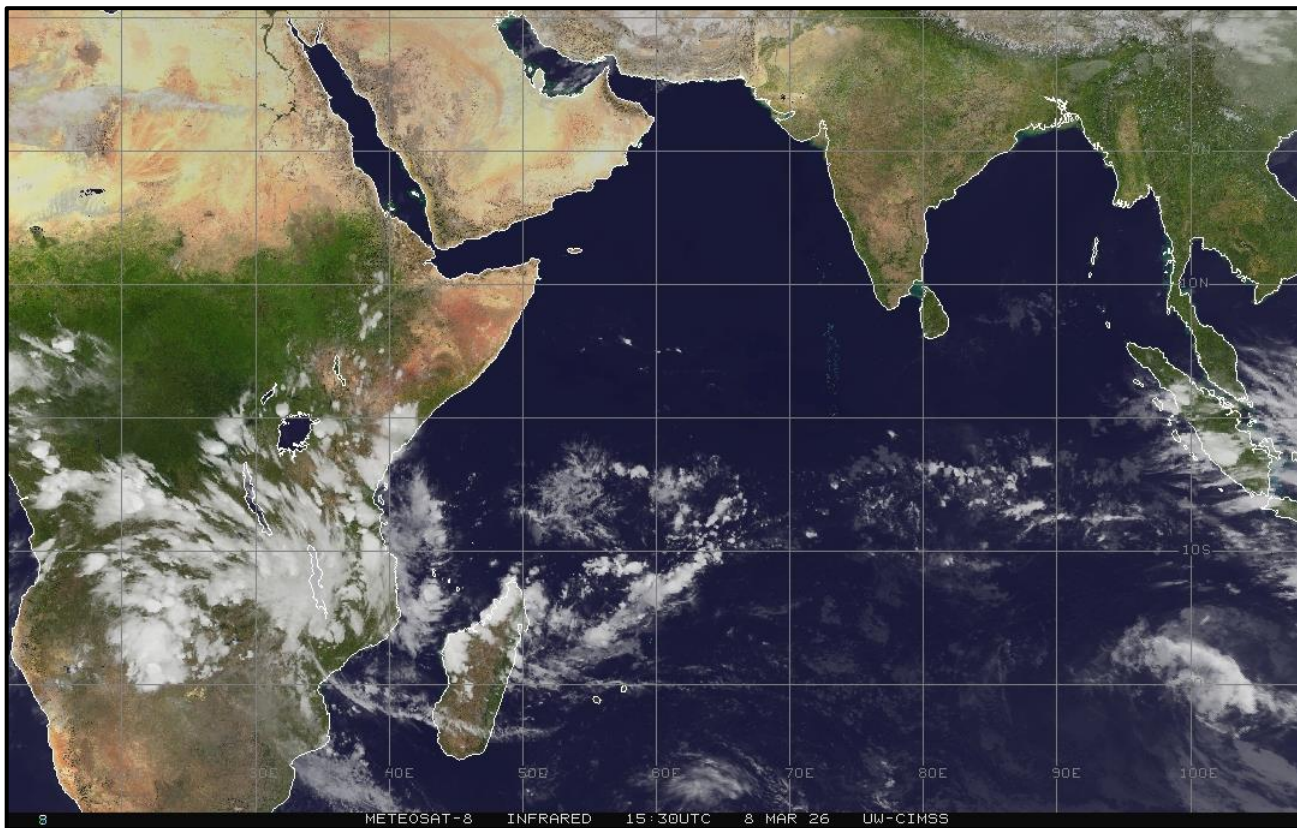

SURFACE ANALYSIS CHART

This analysis charts show the surface pressure pattern over Sri Lanka and the surrounding area. They display isobars (lines of equal pressure) and indicate areas of high (H) and low pressure (L) along with their central pressure value. Isobars are represented by solid blue lines, spaced every 1 hPa. High pressure is usually associated with mainly dry, settled weather with light winds, while low pressure is normally associated with unsettled weather, which is often wet and windy. The lower the pressure, generally the stronger the winds and the heavier the rain.

The map shows Coordinated Universal Time (UTC) and the local time is UTC+5.30.
